

Certificate of achievement

Different Types of Cloud Computing

This is to certify this student pursued studies and completed all the requirements for this course

This certificate is awarded to

Zahid Ullah

This course provides an overview of different types of cloud computing models, including public, private, community, and hybrid clouds. It explains how each model operates, their benefits, and limitations, as well as their use cases. By the end of the course, learners will be able to differentiate between public, private, community, and hybrid clouds, and make informed decisions about which cloud model best suits their organization's needs.
